INTERNATIONAL PRELIMINARY EXAMINATION REPORT

(PCT Article 36 and Rule 70)

Applicant's or agent's file refere AMC044BWO	FOR FURTHER ACT	See Notification of Transmittal of International Preliminary Examination Report (Form PCT/IPEA/416)	
International application No. PCT/EP 03/09931	International filing date (day 08.09.2003	//month/year) Priority date (day/month/year) 17.10.2002	
1	on (IPC) or both national classification and	IPC	
B01J8/02			
Applicant			
AMMONIA CASALE S.A.	et al.		
This international preli	minon, eveningtion report has been	annual but this later with a la	
Authority and is transn	nitted to the applicant according to Art	repared by this International Preliminary Examining icle 36.	
2. This REPORT consists	of a total of A. abasta including this		
2. This REPORT COnsist	s of a total of 4 sheets, including this	cover sneet,	
☐ This report is als	o accompanied by ANNEXES, i.e. sh	eets of the description, claims and/or drawings which have	
been amended a	nd are the basis for this report and/or and Section 607 of the Administrative	sheets containing rectifications made before this Authority	
		monutations under the r O1).	
These annexes consis	t of a total of sneets.		
		,	
3. This report contains in	dications relating to the following item	s:	
	-		
I ⊠ Basis of the	эоринон		
	ishment of oninion with regard to now	elty, inventive step and industrial applicability	
	ty of invention	and industrial applicability	
V ⊠ Reasoned		regard to novelty, inventive step or industrial applicability;	
	cuments cited		
VII Certain def	ects in the international application		
_	servations on the international applica	tion

INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No.

PCT/EP 03/09931

 Basis of the 	report
-----------------------------------	--------

1. With regard to the **elements** of the international application (Replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to this report since they do not contain amendments (Rules 70.16 and 70.17)):

	Des	cription, Pages		
	1-8		as originally filed	
	Clai	ms, Numbers		
	1-7		as originally filed	
	Dra	wings, Sheets		
	1/2-	2/2	as originally filed	
2.			age, all the elements marked above were available or furnished to this Authority in the emational application was filed, unless otherwise indicated under this item.	
	The	se elements were ava	ailable or furnished to this Authority in the following language: , which is:	
		the language of a tra	nslation furnished for the purposes of the international search (under Rule 23.1(b)).	
		the language of publi	ication of the international application (under Rule 48.3(b)).	
		the language of a tra Rule 55.2 and/or 55.3	inslation furnished for the purposes of international preliminary examination (under 3).	
3.			otide and/or amino acid sequence disclosed in the international application, the examination was carried out on the basis of the sequence listing:	
		contained in the inter	rnational application in written form.	
		filed together with the	e international application in computer readable form.	
		furnished subsequer	ntly to this Authority in written form.	
		I furnished subsequently to this Authority in computer readable form.		
		The statement that the international a	he subsequently furnished written sequence listing does not go beyond the disclosure pplication as filed has been furnished.	
		The statement that the listing has been furnitude.	he information recorded in computer readable form is identical to the written sequence ished.	
4.	The	ne amendments have resulted in the cancellation of:		
		the description,	pages:	
		the claims,	Nos.:	
		the drawings,	sheets:	

INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No.

PCT/EP 03/09931

5. 🗆	This report has been established as if (some of) the amendments had not been made, since they have been considered to go beyond the disclosure as filed (Rule 70.2(c)).

(Any replacement sheet containing such amendments must be referred to under item 1 and annexed to this report.)

- 6. Additional observations, if necessary:
- V. Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement
- 1. Statement

Novelty (N)
Yes: Claims 2-7
No: Claims 1
Inventive step (IS)
Yes: Claims 2-7

No: Claims 1

Industrial applicability (IA) Yes: Claims 1-7

No: Claims

2. Citations and explanations

see separate sheet

Re Item V

Reasoned statement with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Reference is made to the following document:

D1: FR-A-2029533

2. The present application does not meet the criteria of Article 33(1) PCT, because the subject-matter of claim 1 is not new in the sense of Article 33(2) PCT.

The document D1 discloses (claims 1-3, example 2, figure 2) a method for carrying out exothermic oxidation reactions. The temperature in the reactor is regulated by controlling the feed of reactants at different points (page 3, lines 8-14 and 34-37) and using external heat exchangers. Thus, it can be assumed that the reactor will operate at isothemal conditions once the equilibrium is reached. The reactor contains one single catalytic bed (see page 2, lines 37-39) because, even considering the figures comprising several catalytic zones, there is only one vessel for the reaction which is said to be filled with catalyst and no reference is found in the document related to the presence of several beds. In any case, the internal structure of the catalytic bed appears to be irrelevant to achieve the control of the temperature. Accordingly, document D1 anticipates the subject-matter of claim 1.

3. The subject-matter of claim 2 differs from the method described in D1, considered to represent the closest prior art, in that a plurality of distribution-suppliers is provided inside the catalytic bed and heat exchange takes place between the bed and the reactants while flowing inside the distribution-suppliers. Accordingly, the subject-matter of claim 2 is new (Article 33(2) PCT.

The method of claim 2 allows a better control of temperature inside the catalytic reactor, since the reactants are supplied along the whole bed and exchange heat with the bed before they are fed at a different point of the catalytic bed. Such an effect was not diclosed or suggested by the prior art. Accordingly, the subject-matter of claim 2 involves an invnetive step (Article 33(3) PCT).

4. Claims 3-7 are dependent on claim 2 and as such also meet the requirements of the PCT with respect to novelty and inventive step.
